

I am a very concerned business owner and lifelong resident of the Town of Yates. I am 100% opposed to this intrusion. I have spent the last thirty years building a business in this community. As the owner of a golf course and outdoor wedding facility I am confident that this will have a negative impact on my business. I have invested my life in establishing a small business and I am devastated over the possibility of Wind Turbines in my town. Who would want to get married next to these monsters?! I firmly believe they are not in the best interest of the Town of Yates. I have lived in this community my entire life, and I love it there. Please stop this project.
